RESUME SUMMARY

Front-end Developer with hands-on experience in building responsive and user-friendly web interfaces. Skilled in HTML, CSS, JavaScript, Java, and React.js, with a strong focus on creating seamless user experiences and writing clean, maintainable code. Adept at collaborating with cross-functional teams to deliver high-quality web applications and continuously improve performance and usability. Passionate about learning new technologies and optimizing front-end development workflows.

PERSONAL DETAILS

Current Location	Indore
Date of birth	July 5, 2003
Gender	Male

EDUCATION

Graduation	B.Tech/B.E. (Computers) IPS Academy, Indore with Score 7.01%
Class XII	CBSE with 67.2% in 2021
Class X	CBSE with 84.5% in 2019

INTERSHIPS AND PROJECTS

Internships	InternPe (Duration May 2024 - June 2024) I have gained hands on experience in html , css and JavaScript as I made project like calculator using html css and JavaScript and also an E commerce website Skills used - Html,Css,Javascript
Projects	Chat Application (Duration July 2025 - August 2025) This project is a simple Chat Management Web Application built with Node.js, Express.js, and MongoDB, featuring an intuitive interface to create, view, and edit chat messages. Using EJS templating, it dynamically renders chat data stored in a MongoDB database, displaying sender and receiver details, message content, and timestamps in a clean, card-based layout. The backend is powered by Express.js with RESTful routes, and Mongoose is used for schema modeling and seamless database operations. Designed with simplicity in mind, the app provides core CRUD functionality for managing chat records, making it a practical example of a full-stack web project integrating server-side rendering and a NoSQL database. Skills used - Node.js,Express,MongoDB college space educational website (Duration January 2025 - March 2025) Developed College Space, an educational notes website using React.js, enabling students to browse and access academic notes by subject or semester. Integrated a Notes API for dynamic data fetching and real-time content updates. Designed a clean, responsive UI with efficient search and filter functionality. Focused on performance, user experience, and modular component architecture. Skills used - HTML,CSS,Javascript,React.js
